Social Economy

Chiapas, First Coffee Producing State in the Country

Problem

Tzeltal Indigenous Communities Living in Vulnerable Conditions and Economic Uncertainty

Constructing An Alternative Value Chain Development

1. 244 families working in the co-operative
2. Conversion to organic coffee fields
3. Agro ecological restoration
4. Exporting 50% of its production to the USA as a finished product

Impact

- Maximum added value allowing to close the value chain from the coffee fields to the cup
- Construction of the new coffee plant and coffee school in Chiapas
- Capeltic model is replicable
